

SUBMISSION

Task 1: Requirements Analysis & Prompt Architecture

Lead: Member 1 (Systems Architect) **Duration:** 30 Minutes **Points:** 20

1. Production-Grade RCTC Prompts

Use the table below to document the production-grade prompts created using the **Role–Context–Task–Constraints (RCTC)** framework. Each row should correspond to **one prompt assigned to one member**.

#	Assigned Member	Role / Persona	Context	Task	Constraints	Exact Prompt
1	None ▾	[Persona]	[Context]	[Task]	[Constraints + negative constraint]	[Prompt 1]
2	None ▾	[Persona]	[Context]	[Task]	[Constraints + negative constraint]	[Prompt 2]
3	None ▾	[Persona]	[Context]	[Task]	[Constraints + negative constraint]	[Prompt 3]
4	None ▾	[Persona]	[Context]	[Task]	[Constraints + negative constraint]	[Prompt 4]

#	Assigned Member	Role / Persona	Context	Task	Constraints	Exact Prompt
5	None ▾	[Persona]	[Context]	[Task]	[Constraints + negative constraint]	[Prompt 5]
6	None ▾	[Persona]	[Context]	[Task]	[Constraints + negative constraint]	[Prompt 6]
7	None ▾	[Persona]	[Context]	[Task]	[Constraints + negative constraint]	[Prompt 7]
8	None ▾	[Persona]	[Context]	[Task]	[Constraints + negative constraint]	[Prompt 8]

Requirement: Each prompt must use the **Role–Context–Task–Constraints (RCTC)** framework, include a defined persona, and contain at least one negative constraint.

2. AI-Generated System Design Outputs

Record the **exact AI output corresponding to each prompt** above.

Prompt 1 — AI Output

[PASTE THE EXACT AI-GENERATED OUTPUT FOR PROMPT 1 HERE.]

Prompt 2 — AI Output

[PASTE THE EXACT AI-GENERATED OUTPUT FOR PROMPT 2 HERE.]

Prompt 3 — AI Output

[PASTE THE EXACT AI-GENERATED OUTPUT FOR PROMPT 3 HERE.]

Prompt 4 — AI Output

[PASTE THE EXACT AI-GENERATED OUTPUT FOR PROMPT 4 HERE.]

Prompt 5 — AI Output

[PASTE THE EXACT AI-GENERATED OUTPUT FOR PROMPT 5 HERE.]

Prompt 6 — AI Output

[PASTE THE EXACT AI-GENERATED OUTPUT FOR PROMPT 6 HERE.]

Prompt 7 — AI Output

[PASTE THE EXACT AI-GENERATED OUTPUT FOR PROMPT 7 HERE.]

Prompt 8 — AI Output

[PASTE THE EXACT AI-GENERATED OUTPUT FOR PROMPT 8 HERE.]

3. Manual Grounding Evaluation

Evaluation:

[Write a 3–4 sentence evaluation verifying whether the AI-generated architecture is realistic for a 3-hour team prototype. Discuss the feasibility of the proposed architecture, technologies, features, and implementation scope.]
