

Task 5: Group Integration & Verification Report

Group Verification Log

Document instances where the team **manually corrected or refined AI-generated output** to address errors, security flaws, missing requirements, or bad practices.

Task #	Identified AI Flaw / Limitation	Manual Correction Applied	Member Responsible
Task 1	[Describe an error, limitation, or unrealistic recommendation in the AI-generated system architecture.]	[Describe the manual correction or refinement made by the team.]	[Member #]
Task 2	[Example: Missing aria-label attributes on input fields.]	[Example: Manually added accessible labels and verified form accessibility.]	[Member #]
Task 3	[Example: AI omitted indexes on foreign key columns.]	[Example: Added non-clustered index creation scripts for the foreign key columns.]	[Member #]
Task 4	[Example: AI refactored the database code without properly	[Example: Added using statements to ensure proper resource disposal.]	[Member #]

Task #	Identified AI Flaw / Limitation	Manual Correction Applied	Member Responsible
	disposing of the connection.]		
[Task #]	[Additional AI flaw / limitation.]	[Manual correction applied.]	[Member #]
[Task #]	[Additional AI flaw / limitation.]	[Manual correction applied.]	[Member #]
[Task #]	[Additional AI flaw / limitation.]	[Manual correction applied.]	[Member #]

Verification Notes

[Optional: Add a brief explanation of how the team verified that the corrections resolved the identified AI-generated issues.]
